Sunshine Resort Hotel

Mamoru wrote a *review on January 17 ★★★★★

This hotel is really good. I visited with my family and stayed three days. It has a big pool that is open from 6 am to 9 pm, so my two daughters enjoyed swimming in the morning. The staff speak English and Spanish. I can only speak Japanese, but they were very kind and showed me the way to the shopping mall. Though it is a little far from the hotel and it took 15 minutes to get there by bus, I enjoyed shopping and bought a lot of *souvenirs!

Hotel Dolphin

Alex wrote a review on January 15 ★★★★★☆

We stayed here for my birthday. We arrived late at night, but the front desk is open 24 hours and the staff were really friendly. This hotel has a nice pool. It is open from 1 pm to 10 pm. Rooms are a little small for my family. My wife and I really liked shopping at Sky Mall. It is just in front of the hotel, so we walked there every day!

Pacific Inn

Carlos wrote a review on January 12 ★☆☆☆☆

Bad experience! When we arrived, so many people were waiting in line at the front desk. The staff were doing their best, but we had to wait for 30 minutes to check in. After that, we had to wait for the elevators for 20 minutes. There are only two. The hotel is new. Everything was nice and clean, but I will never visit this hotel again!

Meg wrote a review on January 11 ★★☆☆☆

I won't stay at this hotel any more. It takes more than two hours from the airport by taxi. My family was really tired. And the staff weren't so helpful. When I asked them how to get to the beach, they didn't say anything and went away. My husband was very angry!! However, rooms were beautiful because the hotel is just one year old.

第7問 英文を読み、以下の問いの答えとして最も適切なものを①～④から一つ選び、
解答用紙にマークしなさい。

Many people are talking about *hybrid and electric cars these days. Electric cars are not as convenient as hybrid cars, and they are more expensive. Hybrid cars can travel *farther than electric cars, but they need gasoline. Electric cars do not use any gasoline at all, so many people think they are kinder to the planet. Nowadays there are many new companies making electric cars, but the history of electric cars is actually very long.

The first electric cars were made in Europe about 140 years ago. Engineers and inventors were interested in using the new technology of electricity to make city streets quieter and city air cleaner. Electric cars were sold to rich people who wanted smooth and comfortable *transportation, and to companies that needed to move their products quickly and safely. At the beginning of the 20th century, there were more electric cars in the United States than gasoline cars.

Electric cars were popular because oil to make gasoline was expensive and difficult to find. However, before World War I, oil was discovered in many places around the world. Gasoline quickly became cheap and easy to buy, and gasoline cars became faster, quieter, and less expensive. Soon, most companies stopped making electric cars. For many years, people forgot all about them.

In the 1990s, scientists started to understand that our environment was changing. They discovered that the planet was getting warmer. One reason was pollution from all the cars and trucks burning gasoline. To solve this problem, engineers began to think about clean and quiet electric cars again.

Electric cars can help the environment by reducing the amount of carbon dioxide (CO₂) in the air, but there are some problems with these cars. Electric cars need large and heavy batteries which are expensive to make and need to be *replaced sometimes. We must make a good plan to reuse or recycle these batteries. If we don't, they will become a problem for the planet too.

The first electric cars were designed as an easier and cleaner way to move about in cities. Modern electric cars are doing the same job, but now they are much

faster and go farther. Driving electric cars can help in the fight against climate change, but they are not a perfect solution. The tool we use to solve one problem should not create other problems.
